

### Accessories

### Dust extraction for external thread cleaners

The dust extraction adapter for static brushes is placed in between the cleaning head and the drive pin and can be connected to a vacuum cleaner. It will then extract dust and other particals away from the operator during the brushing procedure.

ARG series	Article number
ARG-1027	XARGA-1027
ARG-2055	XARGA-2055
ARG-3570	XARGA-3570
ARG-5090	XARGA-5090
ARG-9012	XARGA-9012

ARM series	Article number
ARM-0622	XARGA-0622
ARM-2243	XARGA-2243
ARM-4364	XARGA-4364
ARM-6488	XARGA-6488

### Dust extraction for IRB series

The dust extraction adapter for static brushes is placed in between the drill chuck and the brush and can be connected to a vacuum cleaner. It will then extract dust and other particals away from the operator during the brushing procedure. Its spring based design makes sure that the top of the nut or a blindhole is covered, therefore creating the perfect vortex. The dust extraction adapter will fit any IRB brush with a size between M4 and M72.

Article number: XIRSA-0872

## Dust extraction for IRK series

The dust extraction adapter for adjustable cleaning heads is placed on top of the shaft and can be connected to a vacuum cleaner. It will then extract dust and other particles away from the operator during the brushing procedure. The dust extraction adapter will fit any IRK cleaning head with a size between M70 and M180.

Article number: XIRSA-6013

## Extensions for the IRB series

Extensions are a simple yet convenient tool to get to those hard to reach places. Extensions for the **IRB series** are available in the following sizes:

Description	Article number
Extension 105 mm for M4-M33 (slim line)	XIRA-0833K
Extension 105 mm for M4-M72	XIRA-0872K
Extension 270 mm for M4-M72	XIRA-0872L

## Extensions for external thread cleaners

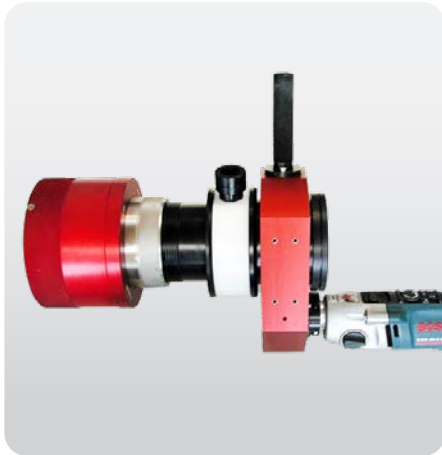

Extensions are a simple yet convenient tool to clean long or protruding studs and bolts. The standard internal depth of our external thread cleaners is 200 mm. An extension tube is an easy way to double the maximum cleaning length. Extensions for the **ARG and ARM series** are available in the following sizes:

ARG series	Article number	ARM series	Article number
ARG-1027	XARGV-1027	ARM-0622	XARMV-0622
ARG-2055	XARGV-2055	ARM-2243	XARMV-2243
ARG-3570	XARGV-3570	ARM-4364	XARMV-4364
ARG-5090	XARGV-5090	ARM-6488	XARMV-6488

## Offset gearbox for ARG series

For studs and bolts that are too long to fit a standard ARG cleaning head, our offset gearboxes are the ideal solution. It can either be used as a mobile system to clean anchor bolts, or as a semi-stationary system by clamping the gearbox onto a vise.

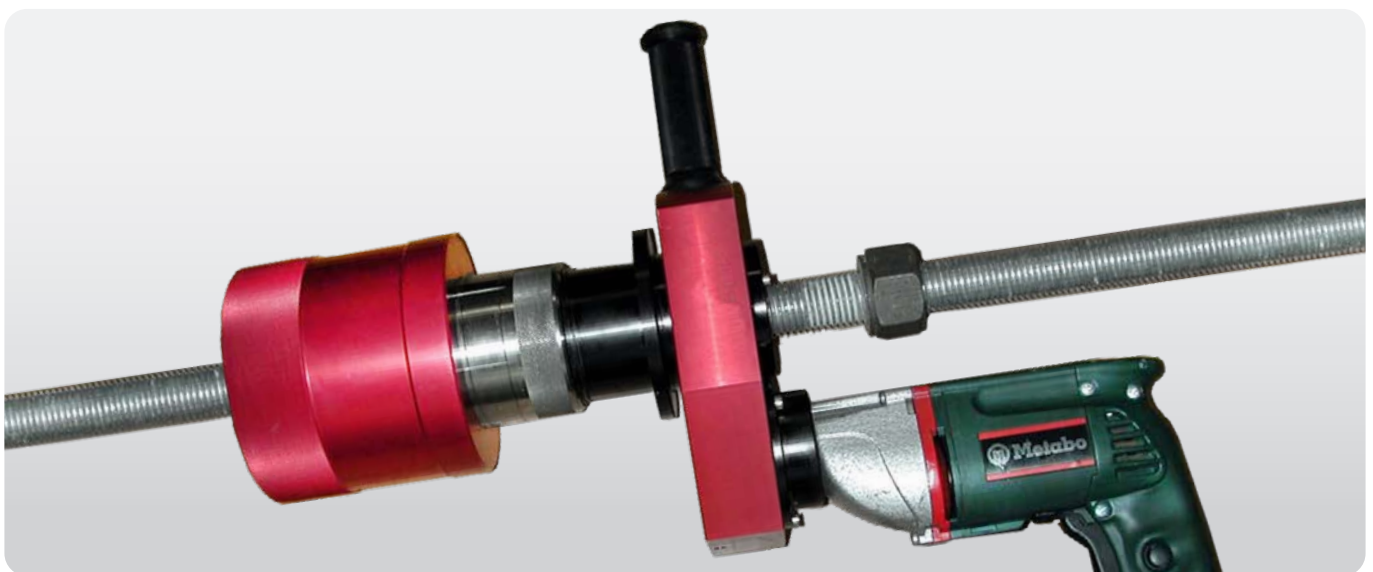

Each gearbox is fitted with a protective tube that keep the stud nicely centered in the middle, while protecting the stud and operator at the same time. The offset gearbox can be used in combination with the **ARG series** external thread cleaner and a dust extraction adapter.

The offset gearbox comes in two sizes, namely The DG-55 and the DG-90.

The DG-55 offset gearbox can clean protruding studs and long bolts in size M10 up to M55.

The larger DG-90 offset gearbox can clean bolt sizes M35 up to M90.

## Foot pedal switch

The foot pedal switch is an easy and safe solution to control the electric or pneumatic drive. The switch greatly increases safety since the operator is in full control and decides when the machine is running.

Foot pedals are available for both electric and pneumatic powered drives.

## Replacement brushes

BoltClean brushes are made out the highest quality materials. They usually last thousands of cleaning rounds, even under the toughest circumstances. Like other wear items you need to change them at some point to ensure the best cleaning results. That is why we offer spare brushes for all our bolt, thread and nut cleaners. All brushes are made of stainless steel.

Every set of replacement brushes contains a replacement for every brush in the tool. Brushes also available in other materials. Please contact us for more information.

IRK series	Spare brush set
IRK-6070	XIRBSET-6090
IRK-7080	XIRBSET-6090
IRK-8090	XIRBSET-6090
IRK-9011	XIRBSET-9011
IRK-1113	XIRBSET-1116
IRK-1315	XIRBSET-1116
IRK-13516	XIRBSET-1116
IRK-1518	XIRBSET-1518

## Complete kits

Kits with external thread cleaners come with a cleaning head, electric powered drive, and spare brushes. Kits with internal thread cleaners are equipped with a wide range of brushes and extensions.

Everything is nicely packed in a protective and durable case with custom made foam inlay.

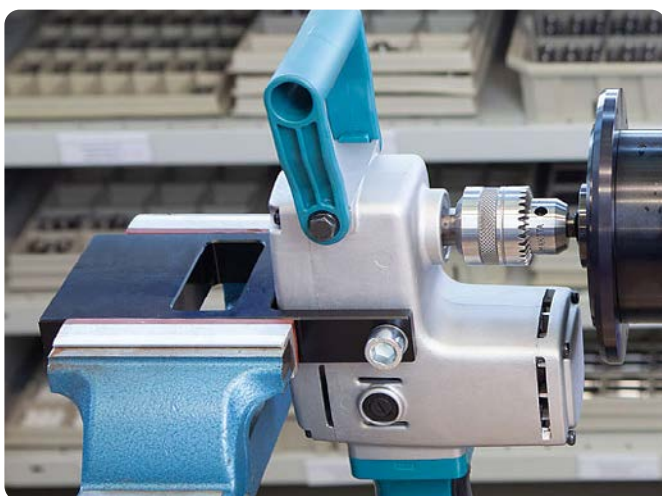

Model	ARG-1027	ARG-2055	ARG-3570	ARG-5090	ARG-90120
Article nr.	XARGS-1027	XARGS-2055	XARGS-3570	XARGS-5090	XARGS-90120

## Vice holders

This simple yet convenient extension is used to fix the drill to a vice, creating a simple but efficient workstation. Please contact us for more information and compatibility.

Description	Article number
Vice holder for in-line drive	XARGSA-06
Vice holder for angled drives	XARGSA-05

## Pneumatic Drive

The Pneumatic Drive can be used to power internal thread cleaners like the IRK and IRB series, and external thread cleaners for bolt sizes up to M55. This drive can be used in combination with the foot pedal switch for pneumatic drives.

Article number: XDRA-10

## Heavy Duty Pneumatic Drive

The Heavy Duty Pneumatic Drive is to be used with external thread cleaners like the **ARG** and **ARM series**, for bolt sizes M55 or larger.

Article number: XDRA-20

## Electric Drive

The Electric Drive is compatible with every available BoltClean cleaning head. The drive is equipped with three handgrips (for a solid and stable grip), a 16 mm drill head, variable and lockable speed and is powered by a standard 230V power outlet.
